

**Memorandum for the Commercial Properties Committee of
the Hong Kong Housing Authority**

Review of Carpark Charges for 2026

PURPOSE

This paper presents the annual review of the Hong Kong Housing Authority (HA)'s carpark charges and seeks Members' approval to maintain the existing carpark charges for one year from 1 January to 31 December 2026.

RECOMMENDATIONS

2. Members are invited to approve the proposal to maintain the existing carpark charges and electric vehicle (EV) charging fees for one year from 1 January to 31 December 2026 (**paragraphs 6 and 8**), and to declassify this paper as proposed in **paragraph 12**.

BACKGROUND

3. As at end September 2025, HA had a portfolio of about 35 800 parking spaces in 210 carparks, which mainly serve the local residents subject to monthly charges. A total of about 4 700 parking spaces (about 13% of this portfolio) are made available in individual estates/courts for visitors on hourly charges. The overall monthly parking occupancy rate of HA's carparks was around 97.4%.

4. HA's carpark charges are differentiated according to the nature of parking spaces concerned as detailed at **Annex**. The monthly charges for private car (PC) parking spaces are further differentiated based on a three-tier occupancy classification^{Note 1}. It is an established policy to fix HA's carpark charges at market level, subject to annual review with the approved new charges taking effect from 1 January of the following year.

PROPOSALS

5. Our market research^{Note 2} indicates that the majority of private sector carparks have their charges maintained since the last review. For carparks under the Hong Kong Housing Society and Link Real Estate Investment Trust, there is a mild increase in monthly and hourly charges. In general, HA's current carpark charges for all types of parking spaces are within the range of private comparable carparks at market level.

6. In view of the above, and after balancing various market factors, we **propose** maintaining the existing monthly and hourly carpark charges (including Day Pass and 24-hour Pass charges for PC parking spaces) for all types of vehicles for one year from 1 January to 31 December 2026 as detailed at **Annex**. For PC parking spaces, the actual monthly charges to be adopted in 2026 for individual carparks may be adjusted due to change in occupancy rate of the carparks concerned under the three-tier charging system.

Note 1 Under the three-tier charging system –

Tier	Occupancy Rate (PC Parking Spaces)	Discount
Tier 1	90% or above	-
Tier 2	50% to below 90%	Approx. 10%
Tier 3	Below 50%	Approx. 15%

The tier to be adopted for the revised charges in the coming year will be based on the occupancy rate of the most recent three months according to records available on 1 November of the preceding year. If the occupancy falls to a lower tier for three consecutive months subsequently during the year, the rate of charges will be discounted.

Note 2 We have made reference to the charges of the following carparks in our review of carpark charges for 2026 –

- (a) Government multi-storey carparks (11 carparks);
- (b) the Hong Kong Housing Society's carparks (55 carparks);
- (c) Link Real Estate Investment Trust's carparks (124 carparks);
- (d) HA's divested carparks held by other private owners (57 carparks); and
- (e) comparable carparks in the private sector (330 carparks).

Other Arrangements

7. The various types of discounts currently adopted for HA's carpark and the discretionary arrangement for Regional Chief Managers or Chief Estate Surveyor/Commercial Properties to make adjustments on hourly parking according to local demand as detailed at **Annex**, as well as the provision of parking promotion schemes for shoppers of HA's retail premises will continue to apply to the 2026 carpark charges.

EV CHARGING FEES

8. As at the end of September 2025, HA provided EV chargers at about 1 050 hourly and about 3 670 monthly PC parking spaces in about 160 carpark. EV charging fee at HA's hourly parking spaces is subject to annual review. Subsequent to our last review in 2024, recent market survey revealed that HA's current hourly charges for fast and medium chargers (including the overtime penalty charges and grace period for fast chargers) are in line with the current charges of government carpark and major private operators which are generally stable. As such, we **propose** maintaining the charging fees for 2026 as detailed in Paper No. CPC 12/2024.

9. HA shall implement a pilot scheme for tendering out EV charging services in HA's carpark in batches (Paper No. CPC 7/2025). Upon the operation of EV charging services by the private service providers, the EV charging fee shall be determined by private service providers with reference to prevailing market rate and subject to HA's prior approval, instead of following the EV charging fee at mentioned in **paragraph 8** above.

FINANCIAL, STAFFING AND INFORMATION TECHNOLOGY (IT) IMPLICATIONS

10. The gross revenue received from HA's carpark was about \$87.4M per month on average for the period from January to September 2025. As the existing charges are proposed to be maintained for 2026, there is no additional financial implication arising from the review. The estimated gross revenue to be generated under the proposed EV charging arrangements as mentioned in **paragraphs 8 and 9** is about \$6.1M in 2026. There is also no additional staffing or IT implication arising from the review as the related workload has been and will continue to be absorbed by existing staff.

PUBLIC REACTION AND PUBLICITY

11. A press release will be issued to announce the arrangements upon Members' approval of the recommendations. Appropriate notice will be issued through our iHousing App for registered carpark users. We expect that the general public and carpark users will welcome the proposal of maintaining the existing carpark charges.

DECLASSIFICATION

12. We *propose* to declassify this paper upon Members' approval of the proposals. Upon declassification, the paper will be made available to the public in the Housing Department (HD)'s library, at HA/HD website and through the Departmental Access to Information Officer.

DISCUSSION

13. At the meeting to be held on 8 December 2025, Members will be invited to approve the recommendations in **paragraph 2** above.
